Abstract: These instructions give you basic guidelines for preparing papers for Data Driven Control and Learning Systems Conference. Note that "Abstract" and "Key Words" are bold.

Key Words: Paper, Instruction, Data Driven Control and Learning Systems Conference

1 Introduction

These are instructions for authors typesetting for the Data Driven Control and Learning Systems Conference (DD-CLS). This document has been prepared using the required format. The electronic copy of this document is available in the annual Data Driven Control and Learning Systems Conference website or the online paper submission system at http://cms.amss.ac.cn. **Please use this document as a "template" to prepare your manuscript. For submission guidelines, follow instructions on the paper submission system as well as the conference website.**

The paper is to be written in two-column format and be right and left justified. The column width should be 84.5mm. The gap between the two columns should be 7mm.

1.1 Instructions for Authors

In order for the proceedings to be ready for distribution at the conference, an electronic copy of the final version of your paper (both MS word and PDF formats) must be submitted through http://cms.amss.ac.cn. Please follow the submission instructions shown on the website.

2 Formatting Instructions

$\text{\LaTeX}\,2_\varepsilon$ Authors: please try to use the paragraph styles contained in this document.

2.1 Page/Font Settings

It is strongly recommended that prospective authors download suitable style file for use with LaTeX and templates for use with MS Word.

Style files and templates provided here have been created to ensure that margin requirement is adequately met. If, for some reason, you are not able to use the provided templates or style files, please strictly observe the margins and font settings in Tables **??** and **??**.

2.2 Section and Subsection Headings

Number section and subsection headings consecutively in Arabic numbers and type them in bold. Avoid using too many capital letters. If any further subdivision of a subsection is needed the titles should be 10 point and flushed left.

Table 1: Page Margins

Paper Size	A4 (21cm×29.7cm)
Top Margin (1st page)	3.0cm
Top Margin (rest)	2cm
Left Margin	1.7cm
Right Margin	1.7cm
Bottom Margin	2.2cm
Column Width	8.45cm
Column Separation	0.7cm
Text Width	17.6cm
Text Height	25.5cm

Table 2: Font Settings

Title	Times New Roman, 16pt, bold
Author List	Times New Roman, 11pt
Authors Address	9pt
Abstract, Key Words	9pt
Section Titles	11pt, bold
Subsection Titles	10pt, bold
Normal Text	10pt
Table/Figure Captions	9pt
Footnotes	8pt
References	9pt

2.3 Main Text

Use Times New Roman with font size 10 point for text (character size). There is no separation between paragraphs, and the first line of each paragraph is indented by 1em. You may type on plain white A4 paper. Typing area should not exceed 176mm×255mm. The text should be prepared with a double column format and single line spacing.

2.4 Tables

All tables must be centered in the column and numbered consecutively (in Arabic numbers). Table headings should be placed above the table. Place tables as close as possible to where they are mentioned in the main text (see Table **??** and Table **??**).

2.5 Figures

All illustrations should be original drawings or photographic prints of originals. Photographs should be glossy prints. Photocopies are often not good enough and should be

avoided. All illustrations must be numbered consecutively, using Arabic numbers. Center figure captions beneath the figure (see Fig. **??**). If possible, do not assemble figures at the back of your article, but place them as close as possible to where they are mentioned in the main text. No part of a figure should go beyond the typing area. Captions should appear below graphical objects, as in Fig. **??**.

Fig. 1: The figure caption

Color and grayscale figures should be prepared with 400 dpi resolution and saved with no compression, monochrome figure should be prepared with 600 dpi resolution and saved with no compression.

2.6 Mathematical Formulas

Mathematical formulas should be roughly centered and have to be numbered as formula (**??**).

$$\lambda_{1,2} = 0.5 \left[c_{11} + c_{12} \sqrt{(c_{11} + c_{12})^2 + 4c_{12}c_{21}} \right] \quad (1)$$

2.7 References

References are listed by order of first appearance and the reference items are represented as Arabic numbers in square brackets, e.g. [**? ? ? ? ?**].

References are titled as "References" with 11pt bold font, flush left and no indent, paragraph spacing before 6pt and after 6pt. The body text of references is formatted as 9pt Times New Roman, initial paragraph no indentation, hanging indent 0.7cm, single space and paragraph spacing after 2pt.

For journal paper references, the information should be included such as author name, article title, journal title, volume number, issue number, page number, year. Similarly, author name, book name, edition number, publisher and year should be included for book references. Examples of both journal paper and book references are shown at the end of this template.

- Proceedings or Books

Give publisher and its location. Give date as (year, month) or (year).
- Journal Article
  Include the issue number in parentheses immediately after the volume number. Give page numbers.
- Article in Proceedings or Books
  Give publisher and its location. Give date as (year, month) or (year). Include page numbers.

3 Checklist

- Do not end a page with a section or subsection heading.
- Do not include page numbers in the text.
- Large figures, tables and mathematical equations may span both columns.
- To balance the two columns on the last page, place the command \balance somewhere in the text of what would be the first column of the last page without balanced columns.
- If you have to plug a large formula, table, etc., which needs a cross column space, you must add the option
  usemulticol
  to the \documentclass command, then use the command
  \singlecolumn{contents}
  to input cross column contents.

4 Paper Submission

After proofreading your paper, it must be submitted via http://cms.amss.ac.cn/ electronically including both MS Word and PDF formats (or LaTeX and PDF formats).

4.1 Electronic Image Files (Optional)

You will have the greatest control over the appearance of your figures if you are able to prepare electronic image files. Please prepare the image files in PostScript(PS) or Encapsulated PostScript (EPS) formats. Use a separate file for each image. File names should be of the form "fig1.ps" or "fig2.eps". Please pack the image files and the paper files (both MS Word and PDF formats or LaTeX and PDF formats) altogether in zip or rar format and upload the packed file.
